MANIPULATOR CRANE CAMERA SYSTEM

ahlbergcameras.com/products/systems/mccs-x

The Manipulator Crane Camera System is an important tool for increasing fuel handling safety in a PWR. The system follows the movements of the manipulator crane during fuel handling. The system gives an immediate verification of the manipulator crane gripper operations and positioning.

MORE INFORMATION MCCS

SPECIFICATIONS

APPLICATIONS

- Follows the movements of the manipulator crane during fuel handling
- Gives an immediate verification of the manipulator crane gripper operations and positions

BENEFITS

- Important tool for increasing fuel handling safety
- Reduces fuel handling time consumption
- Immediate verification of fuel handling operations
- High quality color images for digital video recording
- Cost-effective solution
